

Taught, assessed, and pedagogical approaches used (# of courses)

Outcome 4 is only taught in about 15% of the courses. Given this infrequent coverage, if the program wants to ensure that students have enough opportunities to reach this outcome, a sufficient number of those courses should fall within the **core requirements**.

Outcomes 1 and 2 receive the most coverage and assessment in the program. Given this extensive coverage, the program might want to discuss if this coverage is appropriate and reflects curriculum **priorities**, or, if there are **redundancies** that could and should be replaced with other content.
